x.com/AkshayByte | Etawah, India

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, SQL

Cybersecurity: Web Application Security Testing, Vulnerability Assessment, Burp Suite, Nmap, Secure Coding, OWASP Top 10, Threat Modeling, Authentication & Access Control, Networking

AI & Automation: Google Gemini API (LLM), Prompt Engineering, Tool Calling, Workflow Automation

DevSecOps & Testing: GitHub Actions (CI/CD), Docker, Unit Testing, Git, GitHub

Frameworks & Libraries: FastAPI, Flask, Pydantic, React, Node.js, Express, Next.js, Tailwind CSS

Databases: PostgreSQL, MySQL, Supabase, Redis, Firebase

Tools & Platforms: Linux, Windows, Vercel, Postman, VS Code

PROJECTS

SwasthaTrack

Jan 2025 – Present

Developer | github.com/AkshayByte/swasthatrack | swasthatrack.vercel.app

- Built an asynchronous FastAPI triage pipeline using the Google Gemini API (LLM) with prompt engineering and tool calling, automating priority queues with 90%+ diagnostic accuracy
- Engineered 15+ secure REST endpoints with Pydantic input validation, authentication and role-based access control to protect sensitive clinical data
- Architected a full-stack workflow engine synchronizing clinical data across 5 dashboards with sub-150ms state latency, using PostgreSQL connection pooling to prevent concurrency data mismatches
- Wrote unit tests and automated CI/CD with GitHub Actions; containerized with Docker and deployed on Vercel

Technologies: *JavaScript, FastAPI, PostgreSQL, Gemini API, Docker, GitHub Actions, Tailwind CSS*

KeyWhisper-AI (EM-SEC)

2025

Contributor | github.com/AkshayByte/keywhisper-ai

- Contributed to an EM side-channel research tool analyzing RF keystroke leakage across 100 bins at 2.4 GHz
- Hardened Flask backend with upload sanitization and route isolation, eliminating unhandled 400/500 crashes
- Built an async UI toast engine, preventing render-loop freezes during 60 FPS Canvas waterfall spectrograms

Technologies: *Python, Flask, JavaScript, HTML5 Canvas, REST API*

EXPERIENCE

Red Team Security Intern

Feb 2025 – Mar 2025

Red Team Users

Remote

- Performed threat modeling, application security testing and vulnerability assessments on 15+ web endpoints and network assets using Burp Suite and Nmap, finding Medium to Critical issues (CVSS 6.0–8.5+)
- Documented findings with clear remediation steps in a security report delivered to the internal team

Technologies: *Burp Suite, Nmap, Linux*

EDUCATION

VIT Bhopal University

2023 – 2027

B.Tech., Cybersecurity & Digital Forensics (Final Year) | CGPA: 8.72/10.0

Bhopal, India

CERTIFICATIONS

- The Bits and Bytes of Computer Networking — Google
- Blockchain and its Applications — IIT Kharagpur (NPTEL)
